Trinh Thi My Le

Software Engineer
Ho Chi Minh City | letrinh0904.work@gmail.com | LinkedIn | Portfolio | GitHub | 0326721396

Summary

Software Engineer with a Computer Engineering background and hands-on experience in backend and fullstack development using Laravel, Node.js, React, and TypeScript. Seeking to grow as a Software Engineer by building reliable and scalable software products.

Education

Ho Chi Minh City University of Technology - VNU HCM **Oct 2022 - Nov 2026**
Bachelor of Computer Engineering *Ho Chi Minh City*
Coursework: Software Engineering, Operating Systems, Computer Networks, Web Programming, Mobile Application Development, Software Testing.

Certification: TOEIC (Listening & Reading) 605 **Apr 2025**

Experience

The Cube System **May 2026 - Sep 2026**
Software Developer Fresher *Ho Chi Minh City*
Product: Banking credit-processing system for Japanese client

- Implemented banking business logic in Mendix microflows from Japanese design specifications, processing financial data including Japanese-era dates, interest rates, credit limits, and CIC/JICC references.
- Wrote and executed unit tests with MUnit for each microflow; participated in code reviews and logged defects through the project's QA workflow.
- Prepared QA questions and reports in Japanese to clarify specifications with the Japanese team.
- Completed onboarding training in Selenium (Java) automation and built a fullstack e-commerce application using PostgreSQL, REST APIs, and custom React/TypeScript widgets.

ZIGExN VeNtura **Nov 2025 - Jan 2026**
Fullstack Web Developer Intern *Ho Chi Minh City*
Product: Minden - Online fortune-telling web platform

- Developed and maintained backend features in PHP/Laravel for a production system.
- Optimized push-notification token synchronization with conditional update logic, improving data loading performance and reducing unnecessary API requests by 60–70%.
- Implemented business logic for A/B testing and promotional features.
- Analyzed existing Laravel code and proposed implementation approaches using AI-assisted development tools.

Tam Anh Hospital **Jun 2025 - Jul 2025**
Business Analyst Intern *Ho Chi Minh City*

- Drafted SRS documents and visualized complex workflows using BPMN diagrams to facilitate seamless communication between stakeholders and development teams.
- Created and executed over 50 test cases, performing comprehensive functional testing that identified 15 critical bugs before production.

Technical Skills

Programming Languages: JavaScript (Intermediate), TypeScript (Elementary), PHP (Intermediate), Python (Elementary), SQL (Intermediate).
Backend: Node.js, Express.js, Laravel, Django REST Framework, Socket.IO.
Frontend: React.js, Next.js, Tailwind CSS, HTML, CSS.
Database: MySQL, MongoDB, PostgreSQL, SQLite.
Other Tools: Git/GitHub, Mendix, Selenium, Jira, Postman, Figma, Draw.io.

Projects

Graduation Thesis: Autonomous Quadruped Robot - Dogzilla S2 **Sep 2025 - May 2026**

Role: Leader - **Team size:** 3

- **Description:** Developed the web control and monitoring platform for an autonomous quadruped robot built on ROS 2 Humble with real-time SLAM, autonomous navigation, and AI-based voice interaction — developed as part of a graduation thesis that received 9.4/10.
- **Technologies and tools:** Django REST Framework, Next.js, TypeScript, ROS 2, SLAM/Nav2, OpenRouter API
- **Responsibilities:**
  - Led a 3-member team in developing an autonomous quadruped robot platform integrating ROS 2 Humble, SLAM/Nav2, Raspberry Pi, and real-time system monitoring.
  - Designed and integrated a Django REST API (SQLite), a Next.js/TypeScript dashboard, and robot services for telemetry, device management, and remote control; validated across 38+ field trials.
  - Implemented dual-mode voice control using CSK4002 offline speech and OpenRouter LLM + MCP, achieving 9/10 successful offline commands and 6/8 successful MCP commands.

Booking StudyRoom Website **Feb 2025 - Apr 2025**

Role: Leader - **Team size:** 6

- **Description:** Web application for booking study rooms, managing schedules, and tracking booking history.
- **Technologies and tools:** FastAPI (Python), MySQL, React.js, Tailwind CSS, Figma.
- **Responsibilities:**
  - Managed the team using Agile and delivered all project milestones on schedule.
  - Implemented booking-conflict detection and schedule validation logic.
  - Designed user flows in Figma and integrated frontend with backend APIs using Axios.
- **Link to project:** https://github.com/HK242-BTL-CNPM/Booking_StudyRoom_Web

ChatApp Website **Feb 2025 - Apr 2025**

Role: Fullstack - **Team size:** 2

- **Description:** Real-time messaging platform supporting 1-1 chat, group communication, and file sharing.
- **Technologies and tools:** React.js, Node.js, Express.js, Socket.IO, MongoDB.
- **Responsibilities:**
  - Developed real-time chat features using Socket.IO.
  - Built backend APIs for messaging and user management.
  - Designed MongoDB schema for messages and file storage.
- **Link to project:** https://github.com/MileeDevWork/ChatApp
